

INSTITUTION OF FIRE ENGINEERS, SINGAPORE (IFES) WORKSHOP 2024

Workshop on business continuity and the role of Fire Safety Practitioners. An introduction to code approaches to battery fires and EV Charging Facilities guidelines is also included.

Seminar Information

This seminar addresses key topics on Business Continuity and the Role of Fire Safety Practitioners, with a spotlight on the new and emerging risks of battery fires and EV charging facilities. Themes include strategies for maintaining business resilience in the face of disruptions, the critical responsibilities of fire safety practitioners in safeguarding workplaces, and the importance of adhering to regulations for the safe storage of batteries. Attendees will gain insights into mitigating risks, enhancing safety measures, and ensuring compliance with industry standards to promote continuity and resilience in their organizations.

Target Audience

Fire Safety Engineers, Professional Engineers, Registered Architects, Fire Investigators, SCDF, Fire Safety Managers, Safety Officers, Officers from Relevant Government Agencies, Suppliers of Fire Products, Building Owners, Developers, Building Contractors, Facility Management, Lawyers and Maintenance Personnel, etc.

Speaker's Profile

Gary Ng is the Director of Preparedness & Resiliency and Founder of Infinity Continuity and has about 24 years of operational experience in emergency preparedness, business continuity, and crisis management. Throughout his career, Gary has attended multiple life safety as well as high-profile cybersecurity incidents.

In this session, Gary will introduce the concept of business resiliency, its evolution, and how fire safety professionals have contributed to organizations' resiliency.

Er. Ho Victor is a council member of IFES. He is also a Director of HiLT Pte Ltd, a fire engineering consultancy practice. He has been actively involved in the fire safety consultancy for the past 29 years. He is a member author of the inaugural Singapore Fire Engineering Guidelines 2015 and Singapore Standard SS 634 – Fire Safety Code of Practice for

open plant structures in oil, chemical, and process industries. He recently completed his term in the review of SS 532 – Code of Practice for Flammable Storage and is currently working on the Code of Practice Fire Precaution for Road Tunnels and the revision of CP 52 - Code of Practice for automatic fire sprinkler system. On the international front, he sits on the technical committee of Underwriters Laboratories (UL) - Standard for Electrical Systems for eBikes TC2849 (Voting member) and Technical Committee for Energy Storage Systems and Equipment, TC 9540 (non-voting).
